SUMMARY

Proactive and outcome-focused Software Engineer with hands-on experience across Flutter, React.js, and Spring Boot development, specializing in cross-platform mobile applications and full-stack web solutions. Experienced in developing high-quality, API-driven applications and building responsive user interfaces. Collaborating effectively across teams to achieve project objectives and drive scalable, user-focused software design.

SKILLS

Technical Skills	Flutter, Dart, Java, MySQL, HTML, CSS, Java Script, React.js, Spring Boot
Version Control	Git and GitHub
Tools	Excel, VS Code, Android Studio, Eclipse, Postman

EXPERIENCE

Flutter Intern Cloud ECS Infotech	Jul 2026 - Till Date <i>Chennai, India</i>
Software Engineer Intern PK Innovatives	Aug 2025 - Mar 2026 <i>Chennai, India</i>

PROJECTS

Medicore HMS – Hospital/Clinic Management System

Flutter • Dart • GetX • REST APIs

- Developed a cross-platform hospital/clinic management application using Flutter and GetX, covering appointments, patients, invoices, and payments.
- Integrated REST APIs with token-based authentication, pagination, filtering, and real-time data handling.
- Implemented responsive UI, patient management, appointment scheduling, payment recording, and invoice workflows.
- Developed PDF invoice/receipt generation with Android native integration for file storage and integrated WhatsApp/phone communication features.

AI Agent – CRM & Invoice Collection Management App

Flutter • Dart • GetX • REST APIs

- Developed a Flutter mobile application for managing customer invoices, documents, sales orders, and collection activities. contributing to project modules in a collaborative development environment.
- Integrated REST APIs with pagination, filtering, sorting, authentication, JSON parsing, and dynamic data handling.
- Built collection workflows for Overdue, Upcoming, Promise to Pay, Disputed, Suppressed, and Escalated statuses.
- Implemented reusable models, services, controllers, dashboard components, and API-driven UI using GetX.

CRM Project.

React.js • Node.js • MongoDB • REST APIs

- Developed and enhanced web application Modules using React.js and Node.js, contributing to project modules in a collaborative development environment.
- Identified and resolved UI issues, improving application usability, responsiveness, and overall user experience.
- Performed API testing, application maintenance, and debugging to ensure functionality, reliability, and smooth system performance.

Travel Tourism website(Travelmate)

React.js • Sprin Boot • MySQL • REST APIs

- My PG final year project, A travel tourism website to book travel packages online.
- The website allows users to search and explore various travel destinations, view package details, and request customized tour plans directly from the admin. Admins can manage travel packages, process bookings, and respond to user requests for tailored tour plans, ensuring a personalized experience.
- Built using React.js for the frontend and Java with MySQL for the backend, the platform ensures secure and scalable data handling with real-time updates.

EDUCATION

Master of Computer Science

2023 - 2025

Thiruthangal Nadar College - 78.9%.

Bachelor of Computer Science

2020 - 2023

SRM Institute of Science and Technology, Ramapuram - 87.9%.

ACHIEVEMENTS

- Organized NEXTGEN NEXUS Hackathon and Business plan presentation event in Thiruthangal Nadar College.
- Won second place in paper presentation event at SRM IST, Ramapuram on the TOPIC: "SMART DEVICES".
